FABRIC & CONSTRUCTION

At 6.0 oz (203 GSM), the 1005 uses 100% ringspun cotton to deliver a substantial hand feel that carded blanks at the same weight cannot match, the same standard behind every style in our 100% cotton blanks collection. Ringspinning twists every fiber in a single direction, producing a tighter, more uniform yarn that translates into a smoother print surface and improved durability wash after wash. Side-seam construction keeps the shirt square on the body and prevents torque-related print misalignment. The tear-away label streamlines relabeling for private-label clients and contract decorators running high-volume orders, while the heavier fabric also resists stretching on platens to reduce misprints during production runs. Care: machine wash cold with like colors, tumble dry low.

DECORATION

METHOD	RATING	NOTES
Screen Print	Excellent	Dense surface keeps ink crisp. Ideal for spot color and process
DTG	Excellent	Ringspun cotton holds fine detail with minimal bleed
Embroidery	Good	Stable fabric. May need needle-timing adjustment on multi-head
Heat Transfer	Excellent	Standard cotton press settings. Clean adhesion
Sublimation	Not suitable	Sublimation does not work on 100% cotton
